A Life Transformed Through Love and Patience

Light Your World Ministry

When we opened the doors of Trestia Christian Center for the children in the community, we knew we would receive souls coming from families facing hardship—children who needed not only practical support, but also a place where they could feel seen, welcomed and loved.

We provided them with a warm meal, consistent support, and an environment where teenagers couls sometimes help prepare meals for the younger children, learning responsibility through servicee

Some of the children

The Children's Challenges

Raised in difficult environments, many of these did not know what respect, warmth, or the stability of a trust-based relationship meant. For some, it was hard to receive love, and for others it was just as difficult to give it. Amid these challenges, a young girl named Vio became a clear example for us of the transformation God can bring: in the beginning, she was rebellious, rejected rules, wanted to do only what she decided and struggled greatly with reading.

Vio when we first met her

God's Quiet Work

Through love, patience, and consistency, God quietly began working in her heart, and the change gradually became visible in her behavior, attitude, and involvement.

Transformation that brings Joy

Today, Vio, that once rebellious girl is unrecognizable. She has grown into a responsible young lady, reads very well, and pours her whole heart into church activities.

Gratitude

She sings with joy and never misses a rehearsal, eager to be prepared for Sunday Service. This change fills us with gratitude and reminds us of why we continue this work: so that more and more children may be supported, nurtured , and guided toward God.

Through the after-school program, we help children learn essential skills for daily life, integrate healthily into society and discover what a personal relationship with God means

We invite you to support this ministry through prayer involvement, and finances, so that more lives like Vio's may be transformed.
